CERTIFIED MAIL – RETURN RECEIPT REQUESTED

Dan E. Vaughan, President
Martinique Mining Corporation
1311 West 2150 South
Syracuse, Utah 84075

Dear Mr. Vaughan:

Thank you for submitting your Plan of Operations (Plan) for May Day Mill, UMC-287991. We received your Plan on December 8, 2015 and have assigned your Plan file number UTU-91562. Please refer to this file number in any future communications. Upon review we find your Plan complete with the exception of a monitoring plan which must describe how you will monitor the effects of your operation. Please provide the following:

Monitoring Plan

You must provide a plan to monitor the effects of your operation. The monitoring plan should be designed to do the following: 1) demonstrate compliance with the Plan of Operations and other environmental regulations, 2) provide early detection of potential problems, and 3) supply information that will assist with any needed corrective actions. The scope of monitoring depends on the location and complexity of the operation. Generally, exploration activity requires little or no monitoring, while certain mining activity may need comprehensive monitoring plans. Monitoring plans should avoid duplication by incorporating other state or federal monitoring requirements as appropriate. Below we have provided a general outline of the information needed in a monitoring plan:

Resource Conditions to Monitor (<i>Indicate the conditions you propose to monitor</i>)	<input type="checkbox"/> Surface or groundwater quality/quantity <input type="checkbox"/> Air quality <input type="checkbox"/> Vegetation or reclamation conditions <input type="checkbox"/> Process facility containment performance <input type="checkbox"/> Stability conditions <input type="checkbox"/> Wildlife mortality <input type="checkbox"/> Noise or light levels <input type="checkbox"/> Other (include state requirements):
Monitoring Plan Elements (<i>For each resource or condition monitored address these elements</i>)	<input type="checkbox"/> Type and location of monitoring devices <input type="checkbox"/> Sampling parameters and frequency <input type="checkbox"/> Analytical methods <input type="checkbox"/> Reporting procedures <input type="checkbox"/> Adverse monitoring result thresholds & procedures <input type="checkbox"/> Other:
Monitoring Plans (<i>Describe your monitoring plan(s). Attach additional sheets/maps where needed</i>)	

Upon receipt of these materials the Bureau of Land Management (BLM) will again review your Plan to determine if the information provided is complete. The BLM then completes the environmental review required under the National Environmental Policy Act (NEPA). You cannot proceed with your operation until BLM has completed the NEPA analysis and issued a Decision regarding approval of your Plan. The BLM will also calculate an appropriate reclamation bond amount based on your complete Plan. The reclamation bond must be received and adjudicated by the BLM prior to operations.

If you have any questions regarding this request for additional information, please feel free to contact me or John Reay, Geologist, at 435-542-3461.

Sincerely,

A handwritten signature in dark ink, appearing to read "Sue Fivecoat". The signature is fluid and cursive, with the first name "Sue" and last name "Fivecoat" clearly distinguishable.

Sue Fivecoat
Assistant Field Manager
Henry Mountains Field Station
